INTERNATIONAL PROJECT MANAGEMENT – Economic Development and Cooperation

Participant in Short Course in Cooperative Economics, University of Bologna, Bologna, Italy. June 29 to July 9, 2009.

Senior Project Officer, Cuba. International Centre for Sustainable Cities, Vancouver. Responsible for Project development and management of projects in Cuba, fundraising, networking, presentations. 2004-Present

Course designer and Instructor, University of British Columbia AGSC 302: *International Field Studies in Sustainable Agriculture (Cuba)* May 05, 06, 07. 09 (ongoing) Cuba-based, 3 week, 3 credit course for university students.

Enhancing Sustainable Dairy Production Capacity in Cuba. 2004 – Present Project Leader of this award-winning international project of farmer to farmer collaboration. Partners are International Centre for Sustainable Cities, Asociación Nacional de Agricultores Pequeños and Canadian International Development Agency. The Project Team consisted of Canadian dairy farmers Lorne Hansen, British Columbia; Bruce Beattie, Alberta and Jim Millson (and family), Ontario (all of whom had previously participated in Canada Cuba Farmer to Farmer tours). Enhancing Sustainable Dairy Production Capacity in Cuba brought together the expertise and animal husbandry skills of Canadian dairy farmers with the ingenuity of Cuba's intensive pasture management methods to amplify and document a sustainable, pasture-based dairy production system that could serve as a model for Latin America. The Project constructed three hectares of "Pedestals" (Cuban grass/legume rotational pastures) and 16.5 hectares of solar-power fenced rotational pastures, introduced new calf management practices and the on-farm development of feed rations. This project is a first step along the path of more meaningful farmer-to-farmer engagement that will have as its mandate the ethical sharing of capacity in support of sustainable farming communities, food security and the environment.

Phase Three. Canada-Cuba Farmer to Farmer Project (Project Leader) October 1999 - Present. Organized and led 25 additional delegations to Cuba, bringing to 487 the number of Canadian farmers traveling to Cuba under this project for a two week, five province tour of Cuba's cooperative farms, agri processing enterprises and research facilities. In February 2005 a Cooks' Tour was organized at the request of Cuisine Canada. (see From Cuba with Love, Canadian Living, April 2006.)

THE GRAND TURK COMMUNITY AGRICULTURE PROJECT: A Prescription for Capacity... Gender and Social Integration Analysis, Grand Turk Solar Desalination Greenhouse Project Viability Study. Undertaken for Batavia Greenhouses Ltd. through funding provided by the Canadian International Development Agency. (CIDA) September and October, 2002.

Phase Two. Canada-Cuba Farmer to Farmer Project (Project Leader) January 1999 - September 1999. August 1999. Organized and led First Cuban Delegation to Canada. Twenty seven farmers, provincial ministers of agriculture, scientists and policy makers from ten Cuban provinces visited British Columbia for a three week tour of farms, agri processing enterprises and research facilities from the Peace River to Vancouver Island. Hosted by \$95,000 in donations fund-raised for this purpose.

Phase One. Canada-Cuba Farmer to Farmer Project (Project Leader) August 1998 - January 1999. Organized and led First Canadian Delegation to Cuba. Twenty farmers from British Columbia traveled to Cuba for a ten-day, five province (Matanzas, Cienfuegos, Sancti Spiritus, Ciego de Avila, Havana) tour of Cuba's large cooperative farms, agri processing enterprises and research facilities. Coordinated by International Relations Department, Cuban Ministry of Agriculture.
